

# Genee Vision 50W Visualiser

## Unbound Your Potential

The Genee Vision range quickly became the market leader in Visualisers and rapidly became the Visualiser of choice in hundreds of classrooms around the world. Since its inception, the Genee Vision has always focused on high quality static and moving images with its CMOS and CCD lens technology as well as its host of features to complement today's learning environment and changing pedagogies.

The new Genee Vision Wireless adheres to the high quality of the Genee Vision range with added flexibility and manoeuvrability removing the need for cables and giving more classroom options to teachers and students. The new Genee Vision Wireless range is available in two models; Genee Vision Wireless Portable and Genee Vision Wireless Elite.

## Simple Connectivity

Setting up couldn't be simpler; plug in your wifi dongle and enter your password and you are ready to go!

## Bespoke Software

Easy to use, powerful and created to be an all in one software for you to use with the Visualisers.

## Eliminates Cables

Clutter free environment, no cables are necessary to use only when you need to charge.
